About the event

Factoring continues to grow successfully both in mature markets and in emerging markets. Through their control methods and permanent monitoring of the receivables on their clients' debtors, factoring companies are able to provide more financing than traditional lenders and, at the same time, limit their credit risks to a strict minimum. Factoring companies therefore play an important role in financing the economic activity, as well as during the financial crisis. Traditionally it is small and medium sized companies that benefit most from this financial instrument, but also more important companies use factoring for flexible growth finance or for restructuring purposes.

For the first in-person meeting since the pandemic, FCI, in partnership with EBRD and the Hungarian Factoring Association, has organised the Conference on Evolution and Outlook of Receivables Finance in CEE & SEE, taking place on 9-10 March 2022 in Budapest, focusing on Central and South-Eastern Europe.

The conference will allow participants to network in person and discuss the latest development of factoring and receivables finance in the region.

Leading industry professionals from around the world will be gathering to discuss business and regulatory developments, insurance & risk associated with factoring and payables finance and how to mitigate the risks, sustainability and technological developments like blockchain. Make sure you attend this event and be a part of the conversation.

Who should attend?

The Conference is aimed at an audience of professionals from the CEE - SEE region and beyond, particularly for the leaders of:

- Factoring companies
- Specialized banks and financial institutions
- Consulting firms
- Official organizations
- Companies offering their services to the world of factoring (lawyers, insurers, IT providers)
- Exporters and other companies interested by the world of factoring.
